

# Wayne County Guide to Workplace Exposures

- A person who was in a closed environment (e.g. office, meeting room, or other shared spaces) with a confirmed COVID-19 case for 15 minutes or more and at a distance of less than 6 feet is considered a higher risk of exposure
- Send home any employee who meets the first criteria. Instruct them to self-quarantine at home for 14 days and contact their healthcare provider immediately if they experience symptoms.
- According to CDC guidelines, there is no identifiable risk when walking by or being briefly in the same room as an individual with COVID-19.

## Recommendations for the Workplace:

Separate and immediately send home employees who appear to have fever (>100.4°F), cough, and/or shortness of breath

Cover your nose and mouth with your inner elbow when coughing or sneezing and wash your hands frequently

Often clean frequently touched surfaces with disinfectant
